Lord of the Flies - William Golding

Published in the year World War II, *Lord of the Flies* is a classic coming-of-age novel. Drawing from the rich tradition of Western literature, the coming-of-age allegory incorporates the foundations of Judeo-Christian myth to explain the "loss of innocence" that is at the heart of coming-of-age and maturity. A loss of innocence comes when knowledge is gained about the true, and often harsh, nature of the world. It can also be viewed as a geopolitical allegory reflecting the division of the world following WWII. The primary characters can be seen as Freudian allegory of the various stages of man's moral development.

- Themes of the novel include:
 - Coming-of-age and loss of innocence
 - The inherent nature of man as "savagery"
 - The role of war and violence in the lives of young men

- Upon completing the novel, students should be able to:
 - Recognize the significance of narration and point of view.
 - Identify the basic historical and religious allusions, which are integral to the novel's theme.
 - Explain how the novel functions as a Christian allegory for man's loss of innocence and coming-of-age.
 - Analyze how Golding uses the conventions of language to convey a theme or idea.

Pharmacology questions with answers

- A.effect of drug in the body
- B.effect of body on the drug
- C.both
- D.none

Ans)A

2)pharmacokinetics is the study of

- A.effect of drug in the body
- B.effect of body on the drug
- C.both
- D.none

Ans)B

3)antagonist and inverse agonist differ in

- A.antagonist possess affinity but inverse agonist don't
- B. antagonist possess efficacy but inverse agonist don't
- C. inverse agonist possess affinity but antagonist don't
- D. inverse agonist possess efficacy but antagonist don't

Ans)D(agonist and inverse agonist also possess efficacy and affinity)

4)tolerance n tachyphylaxis differ in

- A.tolerance takes days to develop
- B. tolerance takes minutes to develop
- C. tachyphylaxis takes days to develop
- D. tachyphylaxis takes minutes to develop
- E.A and D

Ans)E(gradual diminution of effect of drug by contuous administration of dose-tolerance

Gradual decrease in responsiveness to drug due to frequent administration-tachyphylaxis)

5)therapeutic index is

- A.ratio of median lethal dose to median effective dose
- B. ratio of median effective dose to median lethal dose
- C.range of plasma concentration of drug
- D.range of clearance of drug

Ans) A
